FORT LAUDERDALE · NEIGHBORHOOD SYSTEM REPORTS

Renormalized pricing by neighborhood

What inventory is **asking** vs what comparable sales say it **should be** — and the adjustment, up or down. Each of the following pages is one neighborhood as a complete system: value, waterfront, build-vs-buy, leasing yield, market conditions and live opportunities.

Pricing model validated out-of-sample to ±16% median error. Figures are comp-based screening signals, not appraisals.

#	Neighborhood	Now asking $/ft²	Should-be $/ft²	Adjust	Action	Yield
